

widely varying estimates in the record, we conclude that the portion of costs that is NTS costs likely varies among LEC switches. Accordingly, we require each price cap LEC to conduct a cost study to determine the geographically-averaged portion of local switching costs that is attributable to the line-side ports, as defined above, and to dedicated trunk side cards and ports. These amounts, including cost support, should be reflected in the access charge elements filed in the LEC's access tariff effective January 1, 1998. (Number of respondents: 13; annual hour burden per respondent: 400 hours; total annual hours: 5200).

c. Cost Study of Interstate Access Service that Remain Subject to Price Cap Regulation: The 1996 Act has created an unprecedented opportunity for competition to develop in local telephone markets. We recognize, however, that competition is unlikely to develop at the same rate in different locations, and that some services will be subject to increasing competition more rapidly than others. We also recognize, however, that there will be areas and services for which competition may not develop. We will adopt a prescriptive "backstop" to our market-based approach that will serve to ensure that all interstate access customers receive the benefits of more efficient prices, even in those places and for those services where competition does not develop quickly. To implement our backstop to market-based access charge reform, we require each incumbent price cap LEC to file a cost study no later than February 8, 2001, demonstrating the cost of providing those interstate access services that remain subject to price cap regulation because they do not face substantial competition. (Number of respondents: 13; annual hour burden per respondent: 8 hours; total annual burden: 104 hours).

d. Tariff Filings. The Commission also adopts several information collections relating to tariff filings. Specifically, the Commission adopts its proposals to require the filing of various tariffs, with modifications. For example, the FCC directs incumbent LECs to establish separate rate elements for the multiplexing equipment on each side of the tandem switch. LECs must establish a flat-rated charge for the multiplexers on the SWC side of the tandem, imposed pro-rate on the purchasers of the dedicated trunks on the SWC side of the tandem. Multiplexing equipment on the EO side of the tandem shall be charged to users of common EO-to-tandem transport on a per-minute of use basis. These multiplexer rate elements

must be included in the LEC access tariff filings to be effective January 1, 1998. Tariff to be filed on December 16, 1997. Other tariff filings dates required by Report and Order are as follows: June 16, 1997, Filing which includes: Downward Exogenous Adjustment to the Traffic Sensitive Basket. December 16, 1998, Filing which includes: Inflation adjustments and the TIC. December 16, 1999, Filing which includes: Inflation adjustments and the TIC. (Number of respondents: 13; annual hour burden per respondent: 320 hours; total annual burden: 4160 hours).

Public reporting burden for the collection of information is as noted above. Send comments regarding the burden estimate or any other aspect of the collections of information, including suggestions for reducing the burden to Performance Evaluation and Records Management, Washington, DC 20554.
